Functional & Performance Testing Template

Model Performance Test

Date	1 October 2026
Team ID	SWTID-2026-8643
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text Input Validation (Email, Branch, Student/Faculty Name fields)	Create Institution Details records with valid text; check Branch accepts only ECE, EEE, CSE; check Student/Faculty Name accept only User references	Valid inputs accepted; Branch limited to the choice list	Records saved with valid Email, Branch (ECE/EEE/CSE) and User references; 6 records created.	**Pass**
FT-02	Number Input Validation (Student Roll Number, Phone Number)	Create records and observe the auto-numbered Roll Number; enter phone numbers in the Phone Number field	Roll Number autogenerates (INS000xxxx); phone numbers accepted	Roll Numbers auto-generated (INS0001001 to INS0001008); phone numbers saved. Note: Phone Number is a String field, so no numeric range check is applied.	**Pass**
FT-03	Access Control / Content Visibility (READ, CREATE, WRITE, DELETE ACLs)	Impersonate users with bb1, bb1+bb2, bb1+bb2+bb3, bb1–bb4 roles, no role, and admin; open u_institution_details.list	bb1 sees only EEE records; bb2 shows New; bb3 allows editing; bb4 allows delete; no role sees nothing; admin sees all	bb1: 2 of 6 EEE records. No role: "No records to display". Admin: all 6. bb2: New button shown. bb3: Description edited to "ACL Is Executed". bb4: record deleted after confirmation.	**Pass**

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-04	Instance / ACL Connection Check (replaces API key check)	Log in as admin, elevate security_admin, open Access Control (ACL), impersonate users and open the table list	Instance responds, ACLs save and take effect on the list	Security_admin elevated; all four ACLs saved; list loaded correctly for every impersonated user.	**Pass**
PT-01	Response Time Test (list load / ACL evaluation)	Use a timer to measure how long the Institution Details list takes to load per user	Should be under 3 seconds	Not measured in the lab. Record the observed time here (e.g., ___ s).	**Pending**
PT-02	Concurrent Access Test	Open the list with several users at the same time (separate sessions)	Instance should not slow down; ACL results stay correct	Not tested in the lab. Record the result after testing.	**Pending**
PT-03	Bulk Data Load Test (replaces file upload; this project has no file uploads)	Import or create a larger set of records (e.g., 100+) and open the list as bb1 and admin	List loads smoothly without errors; bb1 still sees only EEE records	Not tested in the lab (only 6 records used). Record the result after testing.	**Pending**
